

## PRESS RELEASE

**Epic-Premier Insurance Solutions – Industry Demand Generates Growth and Expansion**  
2013 has revealed a prosperous increase for business development and staff growth.

**Lakeland, FL – October 15, 2013.** Epic-Premier, a leading technology and consulting solution provider to the insurance marketplace is experiencing rapid growth due to its strong suite of ConceptOne™ products and services being readily accepted within the industry. Epic-Premier has seen a 22% expansion of staff across the company with indications of continuing that momentum into 2014.

The formation of a Business Development group in 2012 has led the drive to heighten industry awareness for the ConceptOne™ suite of products. We have received positive response to our new support of MS SQL Server, the addition of our Enterprise Transaction Manager (ETM) that manages web portal access, and our new ConceptOne™ Portfolio App for the iPad. We continue to expand and evolve the ConceptOne™ product suite while maintaining a well-designed single integrated platform that provides dynamic, flexible and comprehensive insurance functionality and tools to our clients for seamless integration with their business partners. Epic-Premier's approach of combining professional services, insurance industry knowledge, and proven project methodology has also been a key factor in our successful growth.

ConceptOne™ provides a single-entry, fully integrated Policy, Accounting, Claims, and Document management solution specially designed for the MGA/MGU, Program Administrator, Wholesale Broker, and Specialty Carrier marketplace. ConceptOne™ is flexible enough to manage both up and down stream insurance business in the admitted and non-admitted E&S markets.

### ABOUT EPIC-PREMIER

Since 1996, Epic-Premier has delivered Intelligent Automation Products and Services to the insurance marketplace. We believe software is only part of the equation to implementing a successful insurance automation strategy. We enable our clients to work more efficiently, produce a higher return on investment, and provide better customer service.

More than software. Solutions.
